

As our world continually changes, the way we look back at the men and women who helped build this great nation also changes. *Historic Autographs Famous Americans* product hopes to provide an avenue to see the old as new again and add some new people to the list of those we deem famous; those that may have been overlooked or undervalued to history because of their race, gender or ideas. The checklist is vast as *Historic Autographs* has tried to incorporate a little of something for every collector. *Historic Autographs and Card Company* is the industry leader in historically-based cards and we want to continue to educate and provide diversity within the trading card industry.

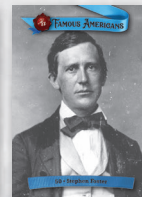

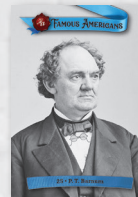

BASE SET *Famous Americans* will become an annual release and HA will continue to add individuals to the checklist that may seem foreign to some but that is the purpose of this series - to teach us all new and interesting things about those people who helped shape our nation. Some of the individuals may have been born elsewhere but found their fame or made their fortunes in the United States. America is the great Melting Pot, the *Famous Americans* series is a melting pot of wonderfully interesting people, so enjoy learning.
